

Assumptions Used In the Development of GSA OCONUS Rates

1. OCONUS Rates are developed using our current JCITP BPA labor rates as the basis.
2. OCONUS Rates are developed using current published U.S. Department of State allowances.

(b) (4)

5. In accordance with instructions provided at the JCITP BPA Kick-Off Meeting of 8 April 2014 A-TS has included the Hazard Pay, Post Hardship Pay, and Defense Base Act Insurance as part of the OCONUS labor rate.

(b) (4)

7. OCONUS rate also includes Defense Base Act (DBA) insurance.
8. Due to the above factors the OCONUS ceiling rates are expected to be discounted based upon specifics of each individual order. This discounting will be detailed in the proposed pricing provided for each order.
9. Additional cost may be applicable for flight, vehicle and vessel based operations. These costs will be proposed, on an order by order basis, in addition to the OCONUS labor rates.
10. The rates provided represent not to exceed ceiling rates.
